

# Smart Mini Controller

*Including Home Automation  
Capability and Telephone Access*

**Product number : 7243 RF**

## Benefits

The Smart Mini-Controller lets you remotely control lights and appliances from the control of your armchair.

Place it near your home entertainment system or by your bedside as you like. With your Infrared Universal Remote Control (X10 compatible), or with your RF X10 Remote Control, or by pressing the buttons on your Mini-Controller, you can turn off the appliances or lights around your home without getting out of your armchair or bed.

You can turn off your child's radio, TV or night light from your bedroom. You can turn your lights on with the press of a button on your remote control if you hear a suspicious noise at night. With your Infra-Red Mini-Controller, you can control virtually everything electrical in your home.

## Key Features

- Remotely control up to 8 Appliance Modules (16 with the remote control) from anywhere in your home.
- Receives commands from your Remote Control (Infrared or RF).
- Sends signals to Modules over your electrical wiring. (No additional wiring required.)
- Turns off everything in the system with one button.

## Technical data

- AC supply: 230VAC/50 Hz
- X10 Powerline: 120KHz/2.5vp-p
- RF receiver frequency: 433,92 MHz
- EMC : EN 301 489-3 - EN50065-1
- Safety : EN60065
- CE Mark
- Ambient temperature: - 10°C to + 50°C (operation)
- - 20° C to + 70° C (storage)
- Dimensions: 115 x 95 x 30 mm (width x height x depth)
